

## Science and God

How old is our universe? I will give you some very good examples here why our earth and the universe was created about 6000 years ago, but in fact can be eternal at the same time.

Genesis 1:1

*In the beginning God created the heaven and the earth.*

In this one verse we see everything we need to get started. "In the beginning" means in the beginning of time. "God created the heaven" means the entire space you see around our planet earth and all the universe. "And the earth" is matter. Time, space and matter were all created by God.

In schools today, kids are taught about the big bang theory and evolution. If you talk about stories and prophecies in the Bible, they deem them not true. How can a THEORY, of a big bang, be taught to kids as truth but true stories in documented history be false? This is because we live in a fallen world that hates the truth of the bible and truth of Jesus Christ.

They teach the world that the smallest particles created so much energy and just exploded, framing all the galaxies, stars and planets and time itself. The so called scientists tell us this happened billions of years ago, forming our whole existence. The reason for this belief comes from just one thing, the rate the universe is expanding. They have apparently calculated the rate of everything in the known universe, and then reversed that theory to then find when everything come to be. This way of thinking is assuming that the universe started at the smallest rate of size when the big bang apparently happened, and continued on that same rate of expansion through the years, and not taking into account that the universe could have expanded a lot faster in the few seconds when the big bang happened.

In the second book of Peter chapter 3 verse 8, he told us that a day is a thousand years, and thousand years as one day. When you calculate the years of the spiritual world, well it turns out that it's over 2 billion years, if you existed in the spiritual world around us. Now, time does not exist in the heavens or the spirit world but if it did, that's the calculation of time.

The bible does not teach of a big bang and this theory is from non believing scientists, but there is some truth to everything existing for billions of years from God's prospective.

Let me show you something here that's rarely talked about.

The bible tells us that the heavens ( spiritual ) and the earth ( matter ) were created about 6000 years ago. You go through all the generations in the bible to find this. From Adam and Eve created on the 6th day, to when Jesus Christ was born in 4BC. In the Old Testament you can find what year the flood happened ( 1656 ), you can find the year Abraham was born ( 1948 ), the year of the Exodus ( 2448 ), the year of the first temple started construction ( 2928 ), and when the prophet Daniel started writing his books in ( 3394 ).

Everything in the bible can be found if you know where to look. From the beginning of all things, to Jesus Christ and to the end of the world, it is all in the word of God. Time and everything in it started when God made all things. Everything was made from God himself. Every single thing from all matter, cells, elements, planets, stars and life come from God. God is eternal and cannot be aged because he has always existed and he lives outside of time and space that was created.

Exodus 3:14

*And God said unto Moses, I AM THAT I AM.*

He has put life into all creation and revealed Himself in nature and in our hearts so that no one can say they don't know who God is.

Romans 1:18-21

*For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who hold the truth in unrighteousness;*

*Because that which may be known of God is manifest in them; for God hath shewed it unto them.*

*For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse:*

*Because that, when they knew God, they gloried him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened.*

Ecclesiastes 3:11

*He hath made every thing beautiful in his time: also he hath set the world in their heart, so that no man can find out the work that God maketh from the beginning to the end.*

God has shown himself to us in everything we see. From nature to animals, the stars in space to the deepest of oceans, he has shown us his amazing work and set in our hearts to know his creation. There will be no excuse for those to say to him, they didn't know an Almighty God existed. They teach us today that science proves the universe is billions of years old to try and kill the idea of what God created 6000 years ago, but, if you can stop and think about it and say, well, God created everything from himself, then all the universal parts that go into everything would be infinite years old because it came from God, but created around 6000 years ago.

Think of it this way. I am 35 years old, and if I could create a new body exactly like mine but just cloned myself, from myself, well in one week, that clone would be one week old but really, in fact, it would be 35 years and one week old, because it came from me.

Every single bit of matter, particles, planets, stars, everything was made by God from God, so we can say the earth and the heavens were created 6000 years ago, but because of all matter, cells, particles and science of life came from God himself, then it would be billions of years old. It would actually be infinite.

Have I lost you? I hope not.

Here is another example that might help you understand what I'm saying.

A young boy, say he's 12 years old, has a heart problem and needs a new heart to live. The doctors find a compatible donor from a man aged 42 years old. They perform medical surgery and give the 12 year old boy the new heart. Two weeks later that boy is recovering and will soon be able to go home with his family. Now, this would be a new heart for the boy, having had it for two weeks now, but because it came from a 42 year old man, this boy's new heart would be 42 years old and two weeks.

God created our world 6000 years ago, from himself being eternal and having always existed.

This is the same with all life force in the universe. It was all created new, but came from God who exists outside of time-space and all creation. Go down to the smallest particle of matter and you will find an energy that is the life force from God. Scientists will never discover this because God will not allow them to, even though new particles like the Higg's Boson were discovered, but without God in our world, we would have no life. God is what drives all existence in our universe as we know it.

John 1:3-4

*All things were made by him; and without him was not any thing made that was made.*

*In him was life; and the life was the light of men.*

Let me go into more detail about how everything works.

This understanding is very similar to the Holy Trinity. God, the Son, and the Holy Spirit are all one but three at the same time. The holy ghost is the spirit of God and came from God.

It has always been with God because it is a form of his spirit, much like we as humans, since we've been made in the womb, our soul has always been with us until we die.

The difference with God is he is eternal and cannot die and has always had the holy spirit with him. This is the same with Jesus Christ the Son of God. He has always been with God because he is God in the flesh.

This is the same with all life in our universe and all creation. It was all made from God because it came from God. Even all the spiritual worlds that we cannot see came from God.

Heaven and Hell are very real places and where you choose to go is your free will. Think down to the smallest atoms and then the particles inside those atoms, and just keep going, you will find particles inside of atoms that are connected to all life because God created it.

So when scientists say God doesn't exist and the universe is billions of years old, well you could say yes it is because it was made from God's life form, but only created about 6000 years ago. When Adam and Eve were created from the dust of the earth, God gave them life.

Genesis 2:7

*And the Lord God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.*

Think about the name of the first man. God created him from atoms and named him Adam. Everything you see, smell, taste and touch is full of tiny atoms that we can't see with the human eye. All life-force comes from particles inside of smaller particles created by God. Real science shows us that all the dinosaurs and animals died in the flood of Noah in 1656 or 2344 BC. They will not teach you or your kids this in schools. Sites like, "Answers in Genesis" and "Genesis Apologetics" will show you some real science of Noah's flood.

Our universe was created 6000 years ago from God. We will not fully understand how everything works until we pass from this world into the next and see more of his beautiful creation.

Everything we think we know about God's creation is just a small part of what can really be known.

Learning about God is endless, but with a bit of spiritual guidance he can show you amazing things about his creation.
